

RYAN NYABEZE

COMPUTER ENGINEERING GRADUATE | DOB: 11/06/2001

RESUME OBJECTIVE

Computer Systems Engineering graduate skilled in Python, Flutter, and backend API development. Seeking opportunities to apply problem-solving, software development to real-world projects while contributing to innovative technology solutions. Currently building a portfolio website to showcase projects and certifications.

TECHNICAL COMPETENCIES

- **Programming & Development:** Python, Java, Flutter, Flask, Django, REST APIs, Git, HTML, CSS/Tailwind, Bootstrap, JavaScript(learning)
- **ICT & Systems Support:** Hardware/software troubleshooting, Network setup, System maintenance, User support, Office/email configuration
- **Areas of Interest:** Backend & Full-Stack Development, Mobile Apps, IoT, Machine Learning, Networking

PROJECTS (More on GitHub → github.com/nyabeze)

- **Fitness & Nutrition Tracker (Flutter + Flask, JWT Auth):** Built cross-platform app for workout, meal, and water tracking with AI-generated workouts, custom meal logging, and secure API integration.
- **SantiagoContracting.co (HTML + Tailwind):** Designed and deployed responsive website for a construction company showcasing services and portfolio.
- **Retrieval Augmented Generation (RAG) Pipeline – (Flutter + Flask)** Developed an end-to-end RAG pipeline integrating document ingestion, vector embeddings, semantic search, and LLM responses to enable accurate, context-aware information retrieval.
- **Personal Portfolio site (In Progress):** Developing a responsive portfolio to highlight projects, certifications, and professional achievements.

CERTIFICATIONS (Verified via LinkedIn profile: www.linkedin.com/in/ryan-nyabeze)

- Python Essentials 1 – Cisco
- Python for Machine Learning – Great Learning
- Data Science & Analytics – HP Life
- Introduction to Data Science – Cisco
- Introduction to IoT – Cisco

WORK HISTORY

IT Administrator (Attachment) – Redd Optical Laboratories, Harare Sep 2022 – June 2023

- Provided technical support and troubleshooting for staff systems, printers, and networks.
- Automated manual processes with scripts, improving operational efficiency.
- Maintained internal databases and inventory systems for lens orders and stock.
- Configured office applications, secure email, and file-sharing tools.
- Documented technical solutions to build internal IT knowledge base.

Address: 4054 3rd Street
Dzivarasekwa 1, Harare

SKILLS

Problem Solving Adaptability

Handling Pressure Leadership

Team Collaboration Public

Speaking Fast Learner

Attention to Detail ICT

Support Networking Basics

Hardware/Software Troubleshooting

System Maintenance

EDUCATION

BSc (Hons) Computer Systems

Engineering – Upper Second Class

(2.1) Midlands State University |

2021 – 2025

O'level and A'level

3 A'level passes

10 O'level passes

Eaglesvale Senior School, 2015–2020

REFEREES

E. Kopera – Redd Optical |

0773 131 978

T.G. Rebanowako - MSU|

077 299 8332

Python Instructor (Volunteer) – KidsWhoCode, Harare

July 2025 – Dec 2025

- Taught Python fundamentals to students using hands-on coding projects.
- Taught students how to build basic REST APIs using Flask, including routes, requests, and JSON responses.
- Helped learners debug code and think algorithmically.
- Designed small exercises and mini-games to reinforce logic and loops.
- Encouraged project presentations to build confidence and communication skills.

PR Writer (AI Training – Freelancer, Remote) – Revelo

Feb 2026 – Mar 2026

- Contributed to AI training projects for Claude Code, focused on improving Python code generation and problem-solving responses.
- Wrote and reviewed prompts involving Python programming tasks, debugging, and code completion.
- Evaluated AI-generated solutions for correctness, efficiency, and adherence to task requirements.
- Provided structured feedback to improve model performance on coding-related tasks.

IT Support – New Health 263, Harare

Feb 2026 – Present

- Diagnosed and resolved hardware/software issues to minimize downtime.
- Assisted with system queries and troubleshooting.
- Automated repetitive IT tasks using Python scripts.
- Assisted in testing the system and rolling it out to clients .
- Documented workflows to improve team collaboration.
